>PROFESSIONAL EXPERIENCE

DreamLine Studios | Senior Software Engineer & Founder | Remote (Austin, TX)   Apr 2015 - Present
- Collaborated with owner of million dollar business in construction industry to ideate, design, develop, test, and deploy real-time platform for managing inventory, saving $60,000+ in material costs yearly.
- Developed full stack JavaScript application using Meteor, ReactJS, MongoDB, and GraphQL, tracking over 2000 unique items with total value of over $100,000.
- Built mobile iOS and Android app using React Native, Apollo, GraphQL, and QR Code Scanner for taking inventory counts, optimizing inventory count time from 8 hours down to less than 3 hours.
- Architected web platform in JavaScript, ReactJS, Apollo, and MongoDB to track of all aspects of construction business including vehicle fleet tracking, CRM, profit projections, and customer feedback collection.

Handsome | Senior Software Engineer | Austin, TX   Jun 2018 - Jun 2019
- Collaborated with globally distributed development team to build Mobiliti Carfinder web application using JavaScript, ReactJS, Redux, and AWS, enabling users to search their area for cars available to rent.
- Replaced ASP.NET shipping schedule search application with Vue system built with lightweight JSON based backend that was 600X faster, reducing schedule search times from 30+ seconds to less than 50ms.
- Collaborated with remote software development team to develop new screens for mobile client onboarding flow using ReactJS, Next.js, Styled Components, and Redux Saga with aim of improving UX.
- Delivered 8 mobile screens which met client's criteria and integrated seamlessly into their current application.
- Collaborated with team of UX designers to prototype new UI for LogicMonitor infrastructure software, saving company $20,000+ in development cost using ReactJS and Redux.

Sovos | Software Engineer III | Boulder, CO   Aug 2016 - Jan 2017
- Identified and repaired bugs in C# .NET application using Visual Studio, allowing Beer, Wine, and Liquor companies to stay compliant to Federal and State laws.
- Trained 2 junior developers in modern front end development methodologies using JavaScript and ReactJS.
- Designed with provided wireframes a ReactJS and Redux based front end app to replace legacy Backbone.js based license renewal system, reducing app load time by over 5 seconds and registration time by full minute.

Fahrenheit | Web Developer | Austin, TX   May 2014 - March 2015
- Developed eCommerce site for local supplement company using WordPress, Woo Commerce, JQuery UI, and LESS opening up sales to online markets, helping them achieve INC 5000 Fastest Growing Private Companies.
